The End of Month Stats run is asking me to counts several missing items, why?

Did you complete a <u>Weekly or a Full Stocktake?</u>

If you run a full month or end of period Stat, you are required to use the Full Stock take type (not the daily or weekly)

If you counted only the weekly items you will not be able run the monthly or end of period, you will be instructed to count the missing items (or the difference between the tow Stocktake types)

Solution:

Load the Full Count Stocktake Type (not weekly) and the attend to the stock items that do not have a count recorded. Save a re-run the Monthly or Period Stat.
